## PDF Version 1.3 PDF

---

This is an example of a version 1.3 PDF.

When you create PDF files, you need to decide which PDF version to use. Generally speaking, you should use the most recent version unless there's a specific need for backward compatibility, because the latest version will include all the latest features and functionality.

However, if you're creating documents that will be distributed widely, consider choosing Acrobat 4.0 (PDF 1.3) or Acrobat 5.0 (PDF 1.4) to ensure that all users can view and print the document. If you create files with Acrobat 5.0 compatibility or later, they may not be compatible with earlier versions of Acrobat. The following table compares some of the functionality in different PDF versions.

*For more information  
and a comparison of some  
of the functionality in  
different PDF versions see  
the Adobe® Acrobat® Help.*
